

Health Warranty

Our goal is to partner a beautiful healthy puppy to a loving new home. Red Barn Doodle Farm will verify that your puppy has received vaccinations, deworming medications, and a health certificate by a licensed veterinarian who certifies that, to the best of his/her knowledge, the puppy was found to be healthy at the time of examination before the purchase takes possession of the puppy.

The owner/purchaser has one week (7 days) from the time of pick-up in which to have the puppy examined by a licensed veterinarian for a clean bill of health. Should a licensed veterinarian find the puppy unfit for the purchaser due to health, congenital, or hereditary disorders only, within this time period, the breeder will exchange the puppy for another. No part of the veterinarian costs shall be refunded to the owner/buyer from the seller.

Threatening health problems or disorders **MUST** have written documentation by a licensed veterinarian within 7 days of receipt of your puppy in order for you to receive a replacement puppy of your choice, whenever one becomes available.

Replacement puppies **WILL NOT** be considered for the normal medical conditions that may arise in most puppies. See the following.

The health conditions listed below are common in all breeds of dogs and will not be covered under the health warranty, they are as follows:

- Overbite or underbite (malocclusion)
- Retained testicle
- Umbilical cord hernias
- No puppy will be replaced or refunded because of hip dysplasia if he/she is allowed to become overweight and/or subjected to inappropriate handling or exercise that would jeopardize the health of the puppy's skeletal structure or improper diet or is neutered or spayed before the recommended age of one year or more. * See [What to Know](#)
